NewBridge GRADUATE INSTITUTE

SCHOOL OF ENGINEERING, IT & DESIGN

Systems and Network Support Programme (Level 1)

Connect systems. Secure networks. Build the future of technology.

Programme | 1 Year Full-Time | International Certification Pathway

WHAT IS THIS PROGRAMME?

The Systems and Network Support Programme develops the technical skills needed to install, manage and support the digital infrastructure that modern organisations rely on.

You'll gain practical experience in computer systems, networking, cloud technologies and cybersecurity while building a strong foundation for a career in IT support and infrastructure.

WHY CHOOSE THIS PROGRAMME?

1. Build in-demand IT infrastructure, networking and cybersecurity skills.
2. Gain practical experience configuring, supporting and troubleshooting technology environments.
3. Prepare for globally recognised CompTIA certification pathways.
4. Develop expertise in technologies that support cloud adoption and digital transformation.

GRADUATE WITH PROOF

Graduate with proof, not just a qualification, through NGI Accelerate, which enables you to build additional certifications and a stronger professional profile while you study.

CAREER OPPORTUNITIES

- Junior Network Engineer
- Junior Systems Engineer
- Junior Security Administrator
- IT Support Technician
- Infrastructure Support Technician
- Systems Support Specialist
- Technical Support Consultant

IS THIS PROGRAMME RIGHT FOR YOU?

- Are you interested in information technology and digital infrastructure
- Do you enjoy solving technical problems
- Do you want to understand how networks and systems work
- Are you interested in cloud computing and cybersecurity
- Do you enjoy analytical thinking and troubleshooting

NewBridge Graduate Institute is registered with the Department of Higher Education and Training as a private higher education institution under the Higher Education Act No. 101 of 1997. Registration no: 2001/HE07/003

NewBridge GRADUATE INSTITUTE

KEY AREAS OF STUDY

- CompTIA A+
- CompTIA Network+
- CompTIA Security+
- CompTIA SecAI+

SKILLS YOU'LL DEVELOP

- Network Support
- Systems Administration
- Technical Troubleshooting
- Cloud Technologies
- Cybersecurity Fundamentals
- IT Infrastructure Management

BAC Accredited
Recognised for internationally benchmarked quality.

NewBridge Graduate Institute is proud to be accredited by the British Accreditation Council (BAC), an internationally recognised independent body that accredits institutions meeting rigorous global standards of academic and operational excellence. This accreditation confirms NGI's commitment to delivering quality education and fostering a supportive learning environment.

For students and parents, this means the assurance of studying at a trusted, globally recognised institution. BAC accreditation affirms NGI's commitment to international standards of quality, strengthening confidence in the education students receive and supporting pathways to further study and career success locally and internationally.

This also aligns with NGI's existing positioning of BAC as an international accreditation that provides additional assurance of ***quality, governance and academic standards.***
